Abstract

As we knew the GDP(gross domestic product) can wield its usefulness on evaluating economy status in one region within one period that may explain the goodness & badness there for us to know the accurate value variation in detail. So for the sake of knowing its meaning we should consider all the aspects to exhibit the intrinsic relationships make us to know the detail joints affect our value and following life convenient conditions like the incoming, expenditure & reserved money in the views of the capital route. Therefore, the high GDP value means the high expenditure like purchasing daily & consumptive goods, experiencing health appliance & drug, buying cars etc. all kinds of expending occasions. Hence, the high society request needs more money with regards to increasing that value that may enhance our level and quality than those lower ones in advance. The more high-tech like AI (artificial intelligence) product includes smart robot, smart flow-line assembly & payment machine with multi-diversities like the third payment. So that the more sophisticated diversities will become more prevalent than ever that requests our engineer and experts to process more possible routes for our more convenience and comfort behavior and paying capital timely and accurately than past. Moreover the higher demand will make our enterprise to proceed more advancement occasions sustainably that may bring out innovation technique and products in future eventually. Through detailing investigation our experts should master the market tendency and corresponding new measures in order to increase our innovative products capacity and push into the relevant market always and continuously. With using those trial occasions all of us can experience its new function and agree to that one advantages under tolerating cheapness cost like

more launch producing. Meanwhile, the basis research & development in units will be advocated by the government institution to rouse the advancement function & multi-functions for the sake of continuously push those smart machine to the public. Hence the high-technique may promote the tertiary industry thriving that also can increase the part GDP raising doubtlessly. At the end the educated talents like university graduates will be recruited to work in different divisions for the sake of communicating each other experiences to reach a good circulation which can help company to finish the useful advice and adopt new innovation ones sustainably and continually.

Keywords: Retrieving the Shenzhen & three provinces GDP variations, introduction to the Clinical Case Reports and Clinical Study, the world nations general income comparison, with sustainability, an innovated study

Introduction

The potential talents need to be emphasized and trained a periodical education experience so as to raise the competition capacity each other that will take up the usefulness methods to be birthed constantly. The collaborative combination and cooperative spirit will be advocated by us so as to make an innovative item like software program making capacity besides hardware searching and exploration. From the composition to the performance the series experimental with a series of processing stages like combining compositions, processing, evaluating, processing again, evaluating longevity & making product and brain judgement like modeling erection with principle formula will indicate that first one factor to determine the predicting performance result and longevity. So we should investigate broadly and clarify the key points and then start our theoretical modeling exhibition with the help of experimental proof that may bring out many chances for us to process continually.

Meantime, the investment behavior may be proceed by the similar method with experiment and judgment capacity. The first experiment will be done several thousand stocks in exchange center use portfolio combining strategic plan and then after some time the evaluating its earning will be expressed, and the goodness with AI investment machine and mathematical deduction modeling to analyse the price changes even vibration. Thereby, the financial innovation will make us to be a rich-man that contributes to the tertiary industry enhancement eventually and ultimately. Hence, the reformation idea will occupy the first and important factor for us to master its behavior and judgement like financial one that may bring us more beneficial capital than ever because the quantization investment and evaluating stock price within 5 thousand stocks. Thereby, the stocks evaluating system will be more prevalent and urgent for our constitution investment behavior. There are so many tips tell us following the main capital to win the game that is like a fairy tale story under the help of AI machine.

At the same time, the nations industry advancement will influence our life level like 16° electric consumption per people per day in China 2025. the more energy electric generator has to be increased gradually year by year so as to raise our GDP value eventually besides giving us more comfortable even convenience above 10 times to catch up the USA developed level. Let us do best endeavour to raise our mission for improving GDP value under cooperation and collaboration spiritual courage within R & D dept(research & development department) and laboratory scope that is to become our diligent destination as to so many scientist and scholars. The better way to be successful is still made by ourselves in different occupations that may create huge power to push the high-technique forwards sustainably whilst the

achievement can be published in a journal with fluently English narration once we had any spiritual inspirations. [1~18]

2. Discussions

The GDP will affect our country level and quality that may change our life style because the high-technique product enters our daily life every a minute. We should appreciate the engineers and experts to take out new technology for us to share due to combining many high-techniques software skill to make the complete product more advancement and industrialization that destroy the traditional economy eventually. The renewable energy like photovoltaic generator, wind turbine one, nuclear generator, hydrogen fuel etc. new source one will be made by us continually to exhibit in front of public. On the other hand, the heat-supplier will be regulated by one house in a building with increasing and decreasing switch by electric releasing role. In the developed country it is essential function, so if you go out to let the heat decrease and when you turn to make it to increase for room temperature maintaining a normal situation in winter. Thereby, the electric consumption will retain in a high level and capacity. The new electric generator may be used from the nature renewable source with green and low carbon fuel atmosphere like photo, wind, nuclear pile & hydraulic one. [30~36]

2.1 Shenzhen & three provinces GDP

The Shenzhen & other three provinces GDP might show 11~0.27 billion yuan by Jiangxi~Shenzhen cities correspondingly in 1979 according to the Figure 1 to exhibit the Jiangxi province forwards economic momentum. Moreover, the Guangxi province following Jiangxi one became the second one wit 9.7 billion yuan then.

Figure 1 The Shenzhen & three provinces GDP analysis in 1979. [1]

On the other side, the Shenzhen & other three provinces GDP might show 56.4~26.5 billion yuan by Guangxi~Shenzhen cities correspondingly in 1991 according to the Figure 2 to exhibit the Jiangxi province forwards economic momentum. Moreover, the Guangxi province following Jiangxi one became the second one wit 51.4 billion yuan then.

Figure 2 The Shenzhen & three provinces GDP analysis in 1991. [1]

On the other side, the Shenzhen & other three provinces GDP might show 34.6%~809% by Shanxi~Shenzhen cities correspondingly in 1991 according to the Figure 3 to exhibit the Jiangxi province forwards economic momentum. Moreover, the Guangxi province following Shenzhen one became the second one with 40% then.

Figure 3 The Shenzhen & three provinces GDP y-y value analysis in 1979~1991. [1]

2.2 Subject for the Clinical Case Reports and Clinical Study

As for Dr & professor. It is greeted from the editorial office of Clinical Case Reports and Clinical Study (CCRCS). We are pleased to extend this invitation to you in recognition of your expertise and contributions in the field of clinical science and medical research. As one of the respected professionals in this area, your involvement would greatly advance the quality and impact of our journal. About the Journal it is to be as below. The clinical case reports and clinical study is a peer-reviewed publication dedicated to publishing high-quality clinical case reports, clinical research, and related scientific studies across medical specialties. We aim to create a vibrant academic platform for global researchers and clinicians. Your expertise in the CCRCS would be invaluable in helping us maintain rigorous scientific standards and support

authors in bringing innovative work to publication. [3] Therefore, we are delighted to invite your submission to that journal for the sake of mutually contributed to the society development with quick publication after careful peer-reviews by our editor &experts.

2.3 The world nations general income comparison

The world nations general income analysis in 1966~1967 might show 27.6~144 billion dollars by Argentina~Germany correspondingly in 1966 according to Figure 4 explained the Japan &Italy following Germany forwards general income to occupy the second &third one with 119 &80 billion dollars.

Figure 4 The world nations general income analysis in 19660~1967. [2]

On the other hand, the world nations general income y-y value analysis in 1966~1967 might show - 8.3%~4.8% by Argentina~Germany correspondingly in 1967 according to Figure 5 explained the Japan &Italy forwards general income y-y value to occupy the No one &two with 20.2% &10.7% respectively.

Figure 5 The world nations general income y-y value analysis in 1966~1967. [2]

At the same time, the world nations general income y-y value analysis in 1966~1967 might show - 10.4%~ -0.8% by Netherlands~Britain correspondingly in 1967 according to Figure 6 explained the Brazil forwards general income y-y value to occupy the No one with 16% then.

Figure 6 The world nations general income y-y value analysis in 1966~1967. [2]

3. Conclusions

As we knew the GDP can wield its usefulness on evaluating economy status in one region within one period that may explain the goodness &badness there for us to know the accurate value variation in detail. So for the sake of knowing its meaning we should consider all the aspects to exhibit the intrinsic relationships make us to know the detail joints affecting our value and following life convenient conditions like the incoming, expenditure &reserved money in the views of the capital route. Therefore, the high GDP value means the high expenditure like purchasing daily &consumptive goods, experiencing health appliance &drug, buying cars etc. all kinds of expending occasions. Hence, the high society request needs more money with regards to increasing that value that may enhance our level and quality than those lower ones in advance. The more high-tech like AI (artificial intelligence) product includes smart robot, smart flow-line assembly &payment machine with multi-diversities like the third payment. So that the more sophisticated diversities will become more prevalent than ever that requests our engineer and experts to process more possible routes for our more convenience and comfort behavior and paying capital timely and accurately than past. Moreover the higher demand will make our enterprise to proceed more advancement occasions sustainably that may bring out innovation technique and products in future eventually. Through detailing investigation our experts should master the market tendency and corresponding new measures in order to increase our innovative products capacity and push into the relevant market always and continuously. With using those trial occasions all of us can experience its new function and agree to that one advantages under tolerating cheapness cost like more launch producing. Meanwhile, the basis research &development in units will be advocated by the government institution to rouse the advancement function &multi-functions for the sake of continuously push those smart machine to the public. Hence the high-technique may promote the tertiary industry thriving that also can increase the part GDP raising doubtlessly. At the end the educated talents like university graduates will be recruited to work in different divisions for the sake of communicating each other experiences to reach a good circulation which can help company to finish the useful advice and adopt new innovation ones sustainably and continually.

Ethic Declarations

The authors declared that there were not conflicts of interest.

Funding

This paper was supported by the Korean Science & Engineering Fund (KSEF) at the granted No. 96-0300-11-01-03, under the Specific Basis Research Program.
